

ORDER BLANK

Morelands' SPANISH FORT NURSERY Daphne, Ala.

Before ordering check the map to the left and our description to determine if the desired item is hardy in your climate.

PLEASE FILL IN THIS ORDER BLANK CAREFULLY

This form will be returned to you with your order. In case of complaint this order blank MUST be returned to us since it is our only detailed record of your order.

CAMELLIAS

CAMELLIA SASANQUAS (Zones I, II and II)

..... Snow On The Mountain **35¢ Each**
..... Cleopatra **20 or more at 25¢**
..... Rosea (Zone 3) **25¢**
..... Mixed **Special - 25 Mixed For \$5.00**

Enclosed for..... Camellia Sasanquas @ 35¢ each \$

CAMELLIA JAPONICAS (Zones I and II)

..... Haley's Monarch **40¢ Each**
..... Hermé **20 or more at 40¢**
..... Brilliant **35¢ Each**
..... Mathotiana **100 for \$30.00**
..... Mathotiana Variegated
..... Pink Perfection
..... Professor Sargent
..... Alba Plena

Enclosed for..... Camellia Japonica @ 40¢ each \$

AZALEAS

GIANT AZALEAS (Zones I and II) (Please check size wanted)

	1st Year Plants	2nd Year Plants
..... Formosa		
..... Pride of Dorking		
..... Moss Point Rose	15¢ Each	20¢ each
..... Pride of Mobile		
..... Southern Charm		

DWARF AZALEAS

..... Coral Bell (Zone I, II, III)	\$14.00	\$18.00
..... Hinodegiri (All Zones)		

Enclosed for..... Azaleas \$

GARDENIAS

Gardenias (Zones I, II and parts of III)
35¢ each - 10 for \$2.50

Enclosed for..... Gardenias \$

ILEX ROTUNDOFOLIA

Ilex Rotundifolia (Zones I, II, and III)
Well branched 12" plants - 35¢ each - 10 for \$2.50

Enclosed for..... Ilex Rotundifolia \$

TOTAL ENCLOSED FOR PLANTS \$

PLUS Postage and handling charge

\$1.00

Total enclosed for plants, postage and handling \$

SPRING BULB LIST

CALADIUMS

Caladiums are our most popular plant. They produce beautifully colored foliage which last all summer and they make a magnificent display for a very modest investment.

While most bulbs which produce in the summer or fall should be planted in the winter or early spring, Caladiums are an exception. It is definitely a mistake to plant Caladiums before the advent of warm weather. We strongly recommend that they not be planted until after the first of May and they may be planted as late as the end of June. Although we have bulbs in stock now, we will not accept orders for delivery before April 1st and we consider even this date too early. When the proper time comes you will receive a descriptive folder on Caladiums. In the meantime if you wish, you may order them, but they will not be shipped until April 1st at the earliest. We must make this limitation since we guarantee all of our Caladiums to produce excellent results; and it has been our experience that if we supply them too early the results will not be satisfactory.

MAGIC LILY

See separate folder.

ANEMONES (ST. BRIGID) Do not confuse with the De Caen or single anemones. Our anemones are full double and look very much like ranunculus, but are much easier to grow. They are good sized bulbs and are guaranteed to sprout, but we cannot guarantee bloom as they only bloom if properly cultivated. Price 40¢ dozen, \$2.50 for 100. Supply is very limited.

GLADIOLI

See separate folder.

PEAT MOSS

If you have good potting soil don't waste your money on peat moss but if your soil is too sandy or "packs too tight" the addition of 1/3 peat moss will do wonders. Peat Moss promotes good root growth but does not replace fertilizer. Enough peat to mix with the soil in six 6" planters - 25¢.

CAMELLIA SASANQUAS

As camellias go, this specie is very hardy. Reports as to just how hardy are conflicting but it is our opinion that they may be grown in Zones I, II and III.

Sasanquas are not suitable for corsage work or cutting. They are hardier and freer blooming than the Camellia Japonicas and we recommend them for landscape use.

Sasanquas make an excellent informal hedge. They may be cut back in the spring but they should not be kept clipped since this will interfere with their bloom. For use as a hedge in Zone I and II we recommend Cleopatra or Snow on the Mountain since they are the most compact. In Zone III Rosea would be preferable since it is somewhat hardier. Our sasanquas are all about 2' tall and well branched. Price for this size reduced from 50c to 35c and in moderate quantities we offer them even cheaper.

Note Our Special Offer: 25 Mixed For \$5.00

CLEOPATRA	Cherry red, single. Very compact growth. Dark green foliage.
SNOW ON THE MOUNTAIN	Semi-double white. Very profuse, our favorite.
ROSEA	Large single flowers of brilliant pink.
MIXED	A mixture of 5 varieties

CAMELLIA JAPONICAS

Where they can be grown, the Camellia Japonica is generally considered the most desirable specie of camellia. The blooms are very satisfactory for cutting and corsages.

Note our reduced prices. Several of the varieties listed below sold last year for 75¢. This year we have a better selection of varieties and we are selling them for the one low price of 40¢ each.

All the Camellia Japonicas listed below are 12" to 18" tall except Alba Plena. We have found, from experience that this size transplants best and in the long run is your best buy.

HALEY'S MONARCH:	Loosely formed full double ball shaped rose color.
HERME:	Bell shaped semi-double pink and white variegated, very unusual and exceedingly beautiful but rather difficult to grow.
BRILLIANT:	Red - Same form as pink perfection but slightly larger
MATHOTIANA:	(Purple Dawn): Our most popular variety, very large pink bloom shading to purple at the edges. Opens with a rose bud center during most of the season but late in the year sometimes show stamens.
MATHOTIANA VARIEGATED:	Same as above but bloom splashed with white.
PINK PERFECTION:	Full double delicate shade of shell pink, flat bloom. Very profuse.
PROFESSOR SARGENT:	Ball shaped dark red boom. The easiest to grow and the hardest camellia japonica that we know.
ALBA PLENA:	The most beautiful and most popular white. This variety is a slow grower and is easily killed by the cold. We recommend it in Zone I only. About 10" tall.

AZALEAS

For massed display of brilliant color the azalea is unexcelled by any other shrub. Azaleas are easy to grow if you are careful to select varieties hardy for your climate and if you plant them in acid soil.

Our map on the reverse side is designed to aid you in selecting the best varieties for your location. Soil in most of the East and Southeast is already acid but if your local soil happens to contain too much lime this can be easily counteracted by the use of an acid fertilizer.

We are now offering both 1st year and 2nd year plants. There is little difference in the size since both have been kept cut back, but the 2nd year plants are heavier rooted and have sturdier stems.

Some of the 2nd year plants will bloom this Spring. In general, the 1st year plants will not bloom until one year later.

GIANT (ZONES I & II)

FORMOSA	Purple. Very drought resistant. Compact attractive dark green foliage.
PRIDE OF DORKING	Red. Grows rather compactly.
MOSS POINT ROSE	A lovely shade of rose. Attractive foliage.
PRIDE OF MOBILE	Watermelon red. Our most popular azalea.
SOUTHERN CHARM	Similar to Pride of Mobile, but more drought resistant and darker green foliage. Bloom is a little larger with a slight purple cast.

DWARF

CORAL BELL	Coral Pink, double, (hardy). Zones I, II and III.
HINODEGIRI:	Red, compact, very hardy. (All Zones).

GARDENIAS

We offer nicely branched 18" to 24" Gardenias for 35¢ each or 10 for \$2.50. These plants are of the so-called "ever blooming type". However, they usually bloom heavily only in spring and fall. We recommend them for Zones I, II and III only. We do not recommend them for indoor

ILEX ROTUNDOFOLIA

This evergreen grows very compactly and is splendid for hedges which do not exceed two feet in height. Individual plants may be pruned to any desired size or shape. Foliage is medium sized and dark green.

Well branched 12" plants 35¢ each - 10 for \$2.50.

PLANTER

Attractive forest green *metal* planter with baked on enamel finish. Has *four side drainage holes* which provide excellent drainage. Ideal for pot plants requiring good drainage (most do). Large enough (over 6" wide) and deep enough (over 6" deep) to give your plants "growing room". Contains enough soil to stay moist for several days between waterings. Give your house plants a chance — plant them in a properly designed container. These are mass produced locally and cost less than common clay pots the same size. Our price is just 25¢ each.

GENERAL INFORMATION

It will speed up the handling of your order considerably if you will use the order blank provided.

In areas where the ground freezes plants will do best if they are planted in the Spring as soon as the ground thaws but they must be protected from exceptionally cold weather after they are planted.

In areas where the ground does not freeze in general they would do best if they are planted during cold weather, but again, they should be protected from unusually cold weather.

No Camellias will be shipped after April 15th.

No plants of any kind will be shipped after May 1st.

All bulb prices are delivered prices. There is no postage or handling charge on bulb orders.

On orders for plants, there is a flat charge of \$1.00 to partially offset the cost of packaging and postage. This is a flat charge and is independent of the size of the order.

Remittances may be made by cash, check or money order. Because mail in our printed self-addressed envelope is almost never lost we recommend cash for your convenience. We will "make good" cash (not over \$3.00) lost in the mail.

OUR LIBERAL THREE-WAY GUARANTEE

- I. ALL OUR STOCK IS GUARANTEED TO ARRIVE IN GOOD CONDITION. We unconditionally guarantee all stock will arrive in good condition. Any of our stock may be returned within 7 days for full refund including return postage. All of our bulbs are guaranteed to sprout and any which do not may be returned for full refund.
- II. ALL OUR STOCK IS GUARANTEED TO GROW. Any stock which dies within one year for any cause whatsoever will be replaced at half price. Any complaints under the terms of Section II of our guarantee should state the kind and number of plants which die and should include 50% of the original cost.
- III. CERTAIN STOCK IS GUARANTEED TO BLOOM. This guarantee varies with the item.

This map is an attempt to divide the eastern section of the United States into climate zones to aid you in selecting stock suitable for your section of the country. We do not guarantee its accuracy and we are well aware of the limitation of any such map. We do feel, however, that it should be of considerable help. It must be realized, of course, that the plants recommended for any one zone may be killed by extremely adverse weather, while on the other hand, by taking extra precautions it is sometimes possible to grow plants in a colder zone than we recommend.
